

The first assignment will provide me with data about students enrolled in the course that I will use both to get to know you better and for examples in class.

1. Go to the web page <http://www.stat.wisc.edu/~larget/survey.html> and complete the survey. I have tried to ask non-threatening questions, but you may leave any question blank that you would prefer not to answer. I will only share your answers with the class in summary and will not reveal your names.
