Over the next two years, Florida Polytechnic University is projected to hire over 70 full-time faculty members to support applied research and learning in emerging STEM fields such as Health Informatics, Nanotechnology, Cyber Security, Mechanical Engineering and Logistics. As the newest member of the State University System of Florida, we are actively recruiting distinguished Technology and Engineering faculty who are interested in building a campus curriculum and culture from the ground up.

We encourage department heads and professors to forward this information to notable Ph.D. candidates who meet Florida Poly’s hiring criteria. We are changing the shape of higher education through immersive teaching models and close collaboration with industry partners.

Successful candidates for faculty positions will have the opportunity to work with industry partners on applied research for near-term solutions, develop undergraduate and graduate courses, and play an influential role in shaping a new and unique institution of higher learning focused wholly on core STEM.

Candidates are encouraged to submit their cover letter and resume online at: https://floridapolytechnic.org/culture/. Applications and questions can also be submitted to careers@fipoly.org.

Sincerely,

Dr. Randy K. Avent
President

Florida Polytechnic University
