- Computer
- qwang's Home
- Trash
- Screenshot.png

Local_Xfer - - x

For Client USB-CD-DVD

xterm

[qwang@desk22] (1) \$

This is what your computer will look like after login.
 You need to keep the black window running during your session, just minimize it to clear your screen.

Use the grey Application drop down menu for Firefox, Thunderbird, Statistics related software, Office software and more.

To log out:
 Go to system dropdown menu and choose logout <yourusername>. Confirm it and then bring up the black window.
 Put your mouse in the black window to activate it and hit "control c". Your computer will shutdown at this point.
